## WVWD Receives nearly \$1.5 Million in Community Project Funding

On May 28, West Valley Water District was presented with nearly \$1.5 million in Community Project funding from Congressman Pete Aguilar. As the district works towards securing sustainable water management in the region, these funds will support two key WVWD projects: **Emergency Generator and the Bunker Hills Well project.**

Thank you to Congressman Aguilar for advocating on behalf of our communities and to our project partner San Bernardino Valley for your commitment to regional water reliability!

# Inland Solar Challenge

In May, West Valley Water District (WVWD) chaired the 13th Annual Inland Solar Challenge (ISC), which took place over three days at Yucaipa Regional Park.

The Inland Solar Challenge is an educational event where local high students from the Inland Empire build 16-foot boats equipped by solar-powered technology and compete against each other in several races and competitions. The event highlights career and educational opportunities in the water and renewable energy field while promoting sustainability.

Every year, the event is funded through sponsorships from local companies and water agencies. To learn more about the ISC or event sponsorship opportunities, please visit [www.inlandsolarchallenge.com](http://www.inlandsolarchallenge.com) or contact Mary Jo Hartley, ISC Chair at (909) 875-1804.

## 2023 Water Quality Report Available Online by July 1

West Valley Water District is proud to report that we have once again met or exceeded all drinking water health standards.

The 2023 Water Quality Report will be **available online by July 1, 2024** at [www.wvwd.org/waterquality](http://www.wvwd.org/waterquality).

To request a printed copy or to receive a Spanish-language version of the Water Quality Report, please call our customer service team at 909-875-1804.
