## West Valley Water District Hosts Earth Day Celebration and Open House!

On Saturday, April 22, West Valley Water District (WVWD) welcomed over 1,000 attendees to its headquarters to celebrate Earth Day. During the event, the WVWD team held an open house to give community members the opportunity to learn, first hand how each department plays a critical role in delivering our customers safe, high quality and reliable water.

If you missed it, here are some of the highlights! Want to check out the rest of the photos? Follow us on Facebook to see the full album!

# Tap Into Rebates During Water Awareness Month

West Valley Water District (WVWD) recognizes May as Water Awareness Month. Throughout the month, we'll be highlighting the people who diligently protect our water resources, including those in the water industry and those in the community doing their part to use water wisely. WVWD encourages customers to tap into savings this month by upgrading to water-saving products including toilets, nozzles and more. Rebates are available!

Follow us on Instagram, Facebook and Twitter to keep up to date on all things WVWD and to learn more ways to save water and money!

## TURF REBATES

Rebates are offered to our West Valley Water District customers. A pre-inspection and post-inspection are required to obtain a rebate. Funding is limited and rebates will be awarded on a first come, first served basis while funding is available.

## WEATHER-BASED "SMART" IRRIGATION CONTROLLER

Receive up to \$100 for a qualifying smart timer. Improve irrigation efficiency by reducing the amount of over watering.

## HIGH EFFICIENCY TOILETS

Receive up to \$50 (maximum 2 per household; \$100 max) for qualifying high efficiency toilets that have a low volume flush of 1.28 gallons per flush.

## HIGH EFFICIENCY NOZZLES

Receive up to \$4 per qualifying high efficiency sprinkler nozzles that reduce water consumption.

## HIGH EFFICIENCY WASHERS

Receive up to \$100 for a qualifying high efficiency washer. Reduction in water usage also reduces energy use because of less water needed to be heated.
